

Energy Policy

The Energy policy of Jyoti B.Ed College is to conserve natural environmental.

1. To drop of the energy utilisation, the energy proficient appliances are used. It will lead to adequate rating of using efficiency equipments.
2. The institutions management opts for the alternate ways of production of energy such as Solar energy.
3. To develop the habit of keeping check over wastage of energy.
4. Regular maintenance of electricity wires appliances tubes, fans etc.
5. Bring in more natural light with windows and bright walls.

Ways of management

- * Replacing conventional chock of all FTC's by LED lights of equal similarities and replacing CRT monitor of PC's with LCD monitor.
- * An arrangement of 60 solar panel 1276 KVM , which covers 45% need of our institution utilisation energy.
- * To develop the habit to stop wastage of energy on working days students' club/House on duty keep check on computers, lights, fan when ever these are not in use and set the computer to sleep or Hibernate mode when not in use.
- * Regular maintenance of batteries, solar panel, Electricity, wires, computers, CPU, printers and other appliances have been done and sufficient finance for the maintenance is available.
- * There is a complete provision of ventilations, sunlight in our college. When we keep the window open then the natural light come to the maximum inside in the classroom. Due to sunlight our college inside area is also always stay bright.
