

Intuition has a stated policy and procedure for implementation of waste management.

Response

Jyoti B.Ed College Campus has developed a different type of waste management policy. Fertilizer is made from organic matter under this policy.

- The college management provides required infrastructure for the purpose of waste management.
- College management provides required finance for creating and procuring infrastructure such as different types of bins trolleys, manual Rickshaw or construction of tank for vermi compost.
- Facilities are to be provide for segregation of solid waste.
- Staff and students engement:-
- Waste management requires behaviors change for this student are to be motivated for waste reduction.
- Technical Support is to be provided whenever required for waste management.

Procedure for implementation:-

Special care has been taken for waste management to preserve the environment of the college campus. Fertilizer is prepared by special method by collecting plant residues and organic matter. Under this method, organic matter is separated from non-organic matter. Different dustbins have been used in the classrooms to separate the items. Students use some waste material to create teaching aids of models etc. The rest of the waste material is taken away by the waste collectors.

Compost is made from pant residues and food residues. It takes about three months to prepare compost. Once the compost is ready, it is used for the plants in the lawns, in addition, In addition the rest of the compost is used by the students of gardening to maintain their pots and small plots of flowers and vegetables. To keep the environment clean, different types of plants have been planted in different places in the college campus. In this way organic matter is also recycled in waste management.
